Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

# Application No. Applicant(s) 10/519 994 MILLS ET AL. Office Action Summary Examiner Art Unit KEVIN R. KRUER 1794 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status Responsive to communication(s) filed on 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 18-33 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. 5) Claim(s) \_\_\_\_\_ is/are allowed. 6) Claim(s) 18-33 is/are rejected. 7) Claim(s) \_\_\_\_\_ is/are objected to. 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) ☐ The drawing(s) filed on 04 January 2005 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received.

Notice of Informal Patent Application

Application/Control Number: 10/519,994 Page 2

Art Unit: 1794

#### DETAILED ACTION

### Priority

 Acknowledgment is made of applicant's claim for foreign priority based on an application filed in 10/18/2002 on Great Britain. It is noted, however, that applicant has not filed a certified copy of the British application as required by 35 U.S.C. 119(b).

#### Information Disclosure Statement

 The IDS filed 01/04/2005 has been fully considered. And initialed copy of said IDS is enclosed herein.

### Drawings

The drawings filed 01/04/2005 are accepted.

#### Specification

The abstract of the disclosure is objected to because it is not filed on a separate page. Correction is required. See MPEP § 608.01(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading.

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.

Application/Control Number: 10/519,994 Page 3

Art Unit: 1794

(e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.

- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (i) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).
- There is no brief description of the drawings in the specification.
- The first line of the specification should be amended to reference the continuing data of the present application.

#### Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claim 24 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Embodiments d, f, and g were not disclosed in the original disclosure.

Application/Control Number: 10/519,994

Art Unit: 1794

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-33 are rejected under 35 U.S.C. 112, second paragraph, as being
indefinite for failing to particularly point out and distinctly claim the subject matter
which applicant regards as the invention. Storage and loss modulii are time
dependent properties but applicant has failed to disclose a temperature rate or load
rate for the claimed properties. (see <u>Time Dependent and Nonlinear Effects in
Polymers and Composites</u> by Richard Allan)

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form
the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 18, 19, and 21-33 are rejected under 35 U.S.C. 102(b) as being anticipated by WO99/62987 (Taniguchi). Herein US 6,541,123 is herein relied upon as an English language equivalent of said WO document.

Taniguchi teaches a film comprising a polypropylene homopolymer (abstract) or a propylene/ethylene copolymer (col 3, lines 31+) and a styrene block copolymer (component D-col 8, lines 38+). The film has a storage modulus (E') of from 5.0x10<sup>8</sup> dvn/cm<sup>2</sup> to 5.0x10<sup>9</sup> dvn/cm<sup>2</sup> and a loss tangent of from 0.2-0.8 (col 5, lines 58+). Said

Art Unit: 1794

loss tangent is the ratio of loss modulus to storage modulus. The examiner takes the position that the storage modulus and loss tangent are sufficient specific to anticipate the claimed dynamic loss modulus and dynamic storage modulus ranges. Furthermore, the examiner takes notice that the storage modulus and loss modulus of a non-oriented film is plane-isotropic (see US 4,942,087). Said film is used for stretch packaging which the examiner understands to read on the claimed label embodiments since such packaging is typically used as labels.

The examiner notes the modulii are measured at a different frequency and temperature. But the examiner takes the position that the claimed modulii are inherent to the film of Taniguchi since the film is compositionally and structurally identical to the claimed film.

## Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 20-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO99/62987 (Taniquchi).

With regards to claim 20, Taniguchi teaches the film may comprise the styrene block copolymer but does not teach the claimed amounts. However, Taniguchi teaches the amount of styrene block copolymer is a result effective variable that affects the films

Application/Control Number: 10/519,994

Art Unit: 1794

transparency, flexibility and loss tangent properties (col 8, lines 42+). Thus, it would have been obvious to the skilled artisan to optimize the amount of block copolymer used. The motivation for doing so would have been to improve the flexibility, loss tangent, and transparency properties of the film.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN R. KRUER whose telephone number is (571)272-1510. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
